# Project PROFILE

**CLIENT:** Arkansas Highway & Transportation Department

**LOCATION:** Little Rock, AR

**PROJECT:** Data Center Cooling Upgrade

**PROJECT SUMMARY:** Determined deficiencies in existing cooling system. Worked with customer to plan future expansion needs and designed a close coupled cooling system that would allow for future expansion.

**PROJECT RESULTS:** A new Chilled Water manifold and piping was installed to new Chilled Water InRow A/C units. The new system has lowered the rack inlets by 9 Deg F. The customer now has redundancy and a scalable architecture that allows for their future growth plans.
